### Business Employment Dynamics in Minnesota — First Quarter 2018

From December 2017 to March 2018, gross job gains in Minnesota totaled 133,031, while gross job losses numbered 124,520, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that gross job gains exceeded gross job losses by 8,511. During the previous quarter, gross job gains exceeded gross job losses by 5,163.

**Chart 1. Private sector gross job gains and losses in Minnesota, March 2013–March 2018, seasonally adjusted**

Source: U.S. Bureau of Labor Statistics.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. Business Employment Dynamics (BED) statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross job gains and the number of gross job losses is the net change in employment. (See the [Technical Note](#) for more information.)

The 133,031 gross job gains in the first quarter of 2018 were below the 142,622 gross job gains in the fourth quarter of 2017. The 124,520 gross job losses in the first quarter of 2018 were lower than the 137,459 gross job losses in the fourth quarter of 2017. (See [chart 1.](#))

Gross job gains represented 5.3 percent of private sector employment in Minnesota in the first quarter of 2018, while nationally gross job gains accounted for 6.0 percent of private sector employment. (See [chart 2.](#)) Minnesota's rate of gross job losses represented 5.0 percent of private sector employment in the first quarter of 2018 and was below the U.S. rate of 5.4 percent.

**Chart 2. Private sector gross job gains and losses as a percent of employment, United States and Minnesota, March 2013–March 2018, seasonally adjusted**

Source: U.S. Bureau of Labor Statistics.

During the first quarter of 2018, gross job gains exceeded gross job losses in 5 of the 11 industry sectors in Minnesota. For example, leisure and hospitality created approximately 26,700 jobs in opening and expanding establishments, but lost more than 23,000 jobs in closing and contracting establishments. The resulting net gain of 3,683 jobs was the largest of any sector in the first quarter of 2018. In education and health services, more than 19,000 jobs were created in opening and expanding establishments and more than 16,000 jobs were lost in closing and contracting establishments, resulting in a net gain of 3,168 jobs. (See [table 1.](#)) Two industry sectors—manufacturing and retail trade—each had gross job gains that exceeded gross job losses by just under 2,000. In the remaining seven industry sectors, the net employment change for each was less than 1,000 in the first quarter of 2018.

Minnesota was among the seven states in the West North Central Census division. Six of the seven states in the division had gross job gains that exceeded gross job losses. (See [table A.](#)) North Dakota and South Dakota had rates of gross job gains that were higher than the 6.0-percent national rate. Five states (Iowa, Kansas, Minnesota, Missouri, and Nebraska) had rates of gross job gains that were lower than the national rate. Iowa, Minnesota, and Missouri had rates of gross job losses that were below the 5.4-percent national rate. The four remaining states had rates of gross job losses that were higher than the national rate.

Footnotes:

(1) Data were calculated for this release using published gross job gains and gross job losses for states located in the West North Central Census Division.

Note: Dash indicates data not available.

### Additional statistics and other information

BED data for the states have been included in [table 2](#) of this release. For more information on the Business Employment Dynamics data, visit the BED web site at [www.bls.gov/bdm](http://www.bls.gov/bdm).

**The Business Employment Dynamics release for second quarter 2018 is scheduled to be released on Wednesday, January 30, 2019.**

### Revisions to Business Employment Dynamics (BED) Data

Data in this release incorporate annual revisions to the BED series. Annual revisions are published each year with the release of first quarter data. These revisions cover the last four quarters of not seasonally adjusted data and five years of seasonally adjusted data.

### Technical Note

The Business Employment Dynamics (BED) data are a product of a federal-state cooperative program known as Quarterly Census of Employment and Wages (QCEW). The BED data are compiled by the U.S. Bureau of Labor Statistics (BLS) from existing QCEW records. Most employers in the U.S. are required to file quarterly reports on the employment and wages of workers covered by unemployment insurance (UI) laws, and to pay quarterly UI taxes. The QCEW is based largely on quarterly UI reports which are sent by businesses to the State Workforce Agencies (SWAs). These UI reports are supplemented by two additional BLS data collections to render administrative data into economic statistics. Together these data comprise the QCEW and form the basis of the Bureau's establishment universe sampling frame.

In the BED program, the QCEW records are linked across quarters to provide a longitudinal history for each establishment. The linkage process allows the tracking of net employment changes at the establishment level, which in turn allows the estimation of jobs gained at opening and expanding establishments and jobs lost at closing and contracting establishments.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. BED statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross jobs gained and the number of gross jobs lost is the net change in employment.

Gross job gains and gross job losses are expressed as rates by dividing their levels by the average of employment in the current and previous quarters. The rates are calculated for the components of gross job gains and gross job losses and then summed to form their respective totals. These rates can be added and subtracted just as their levels can. For instance, the difference between the gross job gains rate and the gross job losses rate is the net growth rate.

The formal definitions of employment changes are as follows:

*Openings.* These are either establishments with positive third month employment for the first time in the current quarter, with no links to the prior quarter, or with positive third month employment in the current quarter following zero employment in the previous quarter.

*Expansions.* These are establishments with positive employment in the third month in both the previous and current quarters, with a net increase in employment over this period.

*Closings.* These are either establishments with positive third month employment in the previous quarter, with no employment or zero employment reported in the current quarter.

*Contractions.* These are establishments with positive employment in the third month in both the previous and current quarters, with a net decrease in employment over this period.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
